Business Architect with 8+ years in product management and business analysis, leading demand management, capability modeling, and solution architecture across 5 ARTs at FedEx. Builds AI agents that automate business architecture work.

SKILLS

Business Process Identification, Requirements Gathering & Analysis, Technical Support, Agile Methodology, User Acceptance Testing (UAT), Project Management, Product Management, Risk Management, Data Mining, Technical Reports, Networking, Forecasting, Documenting Business Requirements, Software Testing, Use Case Definition, Facilitation, Requirements Management, Product Road Mapping, Cross Functional Features, Enterprise Projects, User Experience, User Interface, User Interviews, GAP Analysis, API Development, Business Architecture, Capability Modeling, Data Architecture, AI Agent Automation, Solution Design, SAFe 6

Work Experience

Business Architect **FedEx** **Mar 2025 - Present**

- Streamlined and automated the business demand intake process for 5 Agile Release Trains (ARTs), reducing processing time by 40% and ensuring strategic alignment of prioritized initiatives.
- Led the development and implementation of AI agents to automate business architecture tasks, streamlining the demand intake process and reducing manual analysis by 50%.
- Leveraged AI to process and structure portfolio data, automating the generation of lean business cases and problem statements, which accelerated decision-making for new initiatives.
- Architected and documented a scalable data architecture to support new enterprise activity capabilities, integrating 15+ disparate data sources; projected to improve data consistency by 60%.
- Developed 25+ comprehensive process maps and capability models to define current- and future-state operations, identifying optimization opportunities that contributed to a 15% increase in operational efficiency.
- Spearheaded collaboration with enterprise architects and engineering teams to propose and evaluate technology solutions, resulting in the selection of a new GCP-based platform aligned with FedEx's strategic modernization goals.
- Led 50+ working sessions with cross-functional stakeholders to capture and synthesize complex business requirements for critical capabilities, including volume forecasting, dynamic routing, and service integration.
- Designed and supported the architectural definition for 3 major solutions bridging FedEx Express and FedEx Ground systems, projected to reduce package handling redundancies by 25% and optimize last-mile delivery.
- Authored and presented high-level solution designs and capability documentation for 10+ key initiatives, securing stakeholder buy-in and ensuring implementation readiness across technical and business teams.
- Translated high-level enterprise goals into 12 executable solution concepts, working closely with ARTs to ensure successful delivery and alignment with the broader business vision.
- Delivered a portfolio of projects contributing an estimated \$118M in strategic value to FedEx in FY25 and \$70.5M in FY26.

Senior Product Owner **FedEx** **Oct 2023 - Mar 2025**

- Product Owner for a backend development team that focuses on developing agnostic APIs to support multiple areas of the business and bridge the data gap between FedEx Express and FedEx Ground.
- Delivered new products that removed legacy processes and improved the FedEx global network by using capture data to provide analytics for the network data lake.
- Lead developing a new process that combines FedEx Express and Ground volume management per zip code for the global network.
- Utilize GAP analysis to help support discovery for defining new features and mapping our process that would be developed into a digital solution.
- Owned developing and pushing a new application to production that allows engineers to submit volume changes for all the FedEx Ground facilities.
- Promote/Demo software solutions to leadership to showcase the software solutions that can be implemented on an enterprise level.
- Develop software solutions supporting volume management for all FedEx facilities in the United States and Canada.

Product Owner **FedEx** **Mar 2021 - Oct 2023**
